EXECUTIVE SUMMARY

The 2025–26 Contracting, Procurement, and Leasing Activity Report provides a comprehensive account of the Nunavut Housing Corporation's (NHC) procurement activity for the fiscal year ending March 31, 2026. The report documents all construction, operations and maintenance, professional services, goods, air charter, and leasing contracts valued at $5,000 or more, in accordance with the Government of Nunavut's Contracting Procedures Manual and NHC's obligations under Article 24 of the Nunavut Agreement.

NHC's procurement environment continued to mature during FY25–26, marked by increased competitiveness and stronger policy alignment. The year saw a significant rise in overall procurement volume, with 732 Requisitions for Services (RSNs) issued, an increase of 112 over the previous year and a 63% increase over the four-year period. Growth was driven primarily by Maintenance (151 RSNs), Professional Services (150 RSNs), and Leases (266 RSNs), reflecting the operational demands of an aging housing portfolio and the scale of NHC's territory-wide leasing obligations.

Major Construction activity continued its transition away from reliance on Negotiated Contracts (NC). NC usage declined from 98–100% of construction awards in FY22–23 and FY23–24 to 46% in FY25–26, following the introduction of multi-vendor Master Service Agreements (MSAs) for modular housing supply, installation, and design-build services. Competitive MSA call-ups now account for the majority of new construction awards, representing a structural shift toward more transparent and market-based procurement.

The use of Standing Offer Agreements (SOAs) expanded significantly, particularly in Professional Services, Maintenance, and Goods. SOAs and MSAs together now form the backbone of NHC's procurement framework, enabling faster response times, reduced administrative burden, and improved value for money across recurring service needs.

Overall, the 2025–26 data demonstrates a procurement environment characterized by higher competitiveness, stronger planning, and increased departmental efficiency. The trends observed across the fiscal year reflect NHC's continued commitment to transparency, accountability, and responsible stewardship of public funds, while supporting the GN's economic development and Article 24 objectives.

INTRODUCTION & METHODOLOGY

Introduction

The Nunavut Housing Corporation (NHC) prepares this annual Contracting, Procurement, and Leasing Activity Report to support transparency, accountability, and sound stewardship of public resources. Public reporting on procurement activities is a core requirement across Canadian jurisdictions and is essential to maintaining public trust in government operations. These reports ensure that contracting practices are fair, open, and conducted in accordance with established legislation, policies, and financial controls.

For the Government of Nunavut (GN), transparent procurement practices are especially important given the territory's unique geographic, economic, and social context. The high cost of delivering programs and services across remote communities, combined with limited supplier availability, requires a procurement framework that is both rigorous and adaptable. NHC's commitment to transparent reporting strengthens public confidence, supports effective oversight, and contributes to improved outcomes for Nunavummiut.

This report also supports the GN's obligations under Article 24 of the Nunavut Agreement, which emphasizes the importance of fostering Inuit participation in the territorial economy. By reporting on vendor classification and procurement outcomes, NHC provides a clear picture of how its contracting activities contribute to Inuit and Nunavut-based business development.

The 2025–26 report provides a comprehensive overview of NHC's contracting, procurement, and leasing activities for the fiscal year ending March 31, 2026. It includes statistical summaries, trend analysis, and detailed listings of all contracts that meet established reporting thresholds.

Methodology

This report is structured in accordance with the Government of Nunavut's Contracting Procedures Manual and reflects data collected and maintained by the NHC Procurement Department throughout the fiscal year.

All procurement transactions are recorded at the time of award and include key information such as vendor name, contract type, procurement method, NNI/NTI status, and contract value. These records form the foundation of the annual report.

At fiscal year-end, NHC conducts a multi-step validation process to ensure accuracy and completeness:

1. Cross-referencing with financial records maintained by the NHC Finance Department during year-end closeout.
2. Verification of vendor classification against NNI and NTI registries.
3. Review of procurement method coding to ensure alignment with GN policy definitions.
4. Confirmation of contract thresholds, which determine inclusion in the report.

Contracts are included based on the following thresholds:

- **Major Construction Contracts:** $25,000 and above
    - **Please note:** NHC incurred expenditures related to major construction projects that were below the $25,000 limit. In particular, expenses related to new connections to the power grid and building permit expenses. For the sake of transparency, these expenditures have been included in this report.
- **Operations & Maintenance (O&M) Contracts:** $5,000 and above

Contracts are categorized by:

- **Procurement Selection Method** (e.g., RFT, RFP, SOA, MSA, NC, SS, MOU)
- **NNI Classification** (Inuit, Nunavut, Other)
- **Contract Classification** (Major Construction, Professional Services, Air Charters, Maintenance, Goods, Leases)

This structured approach ensures that the report meets GN standards for transparency, accountability, and value-for-money, while also supporting the GN's commitments under the Nunavut Agreement. By maintaining consistent reporting practices, NHC reinforces its role as a responsible steward of public funds and a partner in supporting Inuit and Nunavut-based economic participation.

REPORT OVERVIEW

The 2025–26 Contracting, Procurement, and Leasing Activity Report provides a comprehensive summary of all procurement activities undertaken by the Nunavut Housing Corporation (NHC) during the fiscal year. The report presents both high-level analysis and detailed listings of contracts that meet established reporting thresholds. It is designed to support transparency, accountability, and informed decision-making across NHC operations.

NHC's procurement activities are analyzed according to three primary dimensions:

- NNI Classification
- Procurement Method
- Contract Type

This structure ensures that the report aligns with the Government of Nunavut's Contracting Procedures Manual and supports the GN's obligations under Article 24 of the Nunavut Agreement, which promotes Inuit participation in the territorial economy.

NNI Classification

All vendors are categorized based on their registration status under the Nunavummi Nangminiqaqtunik Ikajuuti (NNI) Policy and Nunavut Tunngavik Incorporated (NTI):

- Inuit Firm - A business registered with Nunavut Tunngavik Incorporated (NTI) under Article 24 of the Nunavut Agreement. Inuit ownership, management, and control requirements must be met for NTI registration.
- Nunavut Firm - A business registered under the NNI Policy as a Nunavut Business. It must have a physical place of business in Nunavut, meet residency requirements for ownership and workforce, and be in good standing under the NNI registry.
- Other Firm - A supplier not registered with NTI or the NNI registry. These firms do not qualify for Inuit or Nunavut bid adjustments under the NNI Policy.

This classification enables NHC to monitor and report on Inuit and Nunavut business participation in procurement activities, supporting GN economic development objectives.

Report Structure

The report is organized into three main sections, followed by a detailed appendix containing all the data used in this report.

Data Summaries

This section provides a high-level overview of the FY 25-26 data broken down by method of selection, NNI classification, expenditure category, and by which NHC office generated the requisition. It also provides a brief analysis of trends seen over the last four fiscal years.

Major Construction Contracts

This section includes all construction contracts valued at $5,000 or more. It focuses on large-scale capital projects and includes summaries by procurement method and NNI classification, as well as a full detailed listing of all major construction awards.

Operations and Maintenance (O&M) Expenditures

This section includes all O&M contracts valued at $5,000 or more, covering the following categories:

- Professional Services
- Air Charters
- Maintenance
- Goods
- Leases
- Sole Source Contracts

Each category includes summary tables and figures showing procurement method and NNI classification, followed by detailed contract listings.

Appendix A

Appendix A contains the complete detailed listings of all contracts included in Sections A and B. These listings provide transparency and allow for deeper analysis of NHC's procurement activities across communities, contract types, and vendors.

DATA SUMMARIES

The following section provides a consolidated overview of all contracting, procurement, and leasing activities undertaken by the Nunavut Housing Corporation (NHC) during the 2025–26 fiscal year. Summary tables and figures present the distribution of contracts by procurement method, NNI classification, contract type, and NHC office.

These summaries offer a high-level view of procurement activity across the organization and support analysis of trends in spending, vendor participation, and procurement practices. Detailed contract listings are provided in Appendix A.

Method of Selection Summary

Figure 1 presents the total value and proportion of contracts awarded through each procurement method, including Public Tender (RFT), Request for Proposal (RFP), Standing Offer Agreement (SOA), Master Service Agreement (MSA), Sole Source (SS), Negotiated Contract (NC), and Memorandum of Understanding (MOU). This summary illustrates how procurement methods were applied across NHC operations during the fiscal year.

Method of Selection	Amount		Percentage
RFT - Request for Tender	$	12,607,898	7%
RFP - Request for Proposal	$	51,785,094	30%
SOA - Standing Offer Agreement	$	26,270,444	15%
SS - Sole Source	$	3,156,049	2%
MSA - Master Supply Agreement	$	41,209,103	24%
MOU - Memorandum of Understanding	$	3,515,000	2%
NC - Negotiated Contract	$	35,446,048	20%
TOTAL	$	173,989,637	100%

Table 1 - Method of Selection Summary

NNI Classification Summary

Figure 2 summarizes contract awards by vendor classification: Inuit, Nunavut, and Other. This breakdown supports monitoring of Inuit and Nunavut business participation in accordance with the NNI Policy and Article 24 of the Nunavut Agreement. The summary reflects the total value and percentage share of contracts awarded to each classification.

Classification	Amount	Percentage
Inuit	$ 52,808,887	30%
Nunavut	$ 22,281,157	13%
Other	$ 98,899,594	57%
TOTAL	$ 173,989,637	100%

Table 2 - NNI Classification Summary

Report Category Summary

Figure 3 provides a summary of contract values by major report category, including Major Construction, Professional Services, Air Charters, Maintenance, Goods, and Leases. This overview highlights the distribution of procurement activity across NHC's operational areas.

Category	Amount	Percentage
Major Construction	$ 76,254,082	44%
Professional Services	$ 13,895,604	8%
Air Charters	$ 130,121	0%
Maintenance Expenses	$ 17,071,753	10%
Goods	$ 14,852,983	9%
Leases	$ 51,785,094	30%
TOTAL	$ 173,989,637	100%

Table 3 - Report Category Summary

NHC Office Summary

Figure 4 summarizes procurement activity by NHC office or region, including Directorate, Headquarters, Qikiqtaaluk, Kivalliq, and Kitikmeot. This breakdown supports analysis of regional spending patterns and operational needs across the territory.

Office	Amount	Percentage
Directorate	$ 112,412,106	65%
Headquarters	$ 622,672	0%
Qikiqtaaluk	$ 42,046,080	24%
Kivalliq	$ 11,701,520	7%
Kitikmeot	$ 7,207,260	4%
TOTAL	$ 173,989,637	100%

Table 4 - NHC Office Summary

TRENDS AND ANALYSIS

The following section provides a consolidated analysis of the Nunavut Housing Corporation's (NHC) contracting and procurement activity over the past several fiscal years. This analysis is intended to complement the statistical summaries presented earlier in the report by identifying meaningful patterns, structural shifts, and emerging operational trends across NHC's procurement portfolio. Together, these insights support evidence-based decision-making, strengthen corporate oversight, and help ensure that NHC's procurement practices continue to align with Government of Nunavut (GN) policy requirements and Article 24 objectives.

Across the review period, several notable trends have emerged. These include a sustained reduction in the use of Negotiated Contracts, a broader and more deliberate diversification of procurement methods, and a significant year-over-year increase in the volume of Standing Offer Agreement (SOA) call-ups. These shifts reflect NHC's ongoing efforts to strengthen competitive procurement, expand opportunities for Inuit and Nunavut firms, and modernize its contracting approach in response to operational demands.

The analysis also highlights the growing role of structured procurement tools, such as Master Service Agreements (MSAs) and Standing Offer Agreements (SOAs); in enabling timely, compliant, and cost-effective service delivery across the territory. At the same time, the data shows that sole-source contracting is becoming more targeted and policy-aligned, with usage concentrated in areas where urgency, regulatory requirements, or supplier exclusivity justify sole-sourcing.

Taken together, these trends demonstrate a maturing procurement environment within NHC. They signal a shift toward more transparent, competitive, and strategically balanced contracting practices that better support housing development, maintenance operations, and corporate service delivery across Nunavut. The subsections that follow provide a detailed examination of each trend and its implications for NHC's ongoing procurement strategy.

Decline in Negotiated Contracts (NC)

The use of Negotiated Contracts (NC) has undergone a significant reduction across the past four fiscal years. In FY22-23 and FY23-24, NCs accounted for nearly all Major Construction expenditures:

- FY22-23: NC represented 98% of all Major Construction awards.

- FY23-24: NC represented 100% of Major Construction awards.

Beginning in FY24-25, NHC introduced a multi-vendor Master Service Agreement (MSA) for modular housing supply, modular installation, and design-build construction services. This single change reduced reliance on NCs:

- FY24-25: NC represented 51% of all Major Construction awards.
- FY25-26: NC represented 46% of Major Construction awards.

By FY25-26, the procurement landscape had diversified further:

- NCs were used only for specific, justified cases, such as:
    - Large, complex capital projects (e.g., Birchcliff's 46-unit development)
    - Unique infrastructure (e.g., Qillaq Innovations' LHO warehouse)
- The majority of new construction shifted to MSA-based competitive call-ups.

This represents a policy-aligned correction away from sole-vendor dependency and toward competitive procurement.

Diversification of Procurement Methods

Over the past several fiscal years, the Nunavut Housing Corporation (NHC) has demonstrated a clear and deliberate shift toward a more diversified procurement approach. This evolution reflects both operational necessity and a maturing procurement environment that increasingly aligns with Government of Nunavut (GN) contracting policy, risk-management expectations, and Article 24 objectives. The data shows that NHC is moving away from reliance on a small number of procurement tools and toward a balanced portfolio that leverages competitive, structured, and scalable methods.

A review of procurement activity from FY22-23 through FY25-26 reveals several important developments. The introduction and expansion of Master Service Agreements (MSAs) and Standing Offer Agreements (SOAs) has significantly broadened the range of procurement pathways available to NHC. These instruments now support a wide array of operational needs, including modular housing supply, technical services, environmental assessments, human resources, financial support, and project management. Their increased use has reduced administrative burden, and improved response times.

Sole source contracting has become more targeted and policy-aligned. Sole sourcing continues to play an essential role in areas such as QEC power connections, GN permit issuance, emergency repairs, and specialized software. Its use in these contexts reflects operational realities across Nunavut, while the broader procurement environment shows stronger planning, more active market engagement, and an expanding range of competitive options available through MSAs and SOAs.

Overall Volume of RSNs

The volume of Requisitions for Services (RSNs) has increased steadily across the four-year period, rising from 450 RSNs in FY22-23 to 492 in FY23-24, 620 in FY24-25, and 732 in FY25-26. This represents a total increase of 282 RSNs, or 63% growth over the period. The year-over-year increases-+42, +128, and +112 respectively-demonstrate both expanding operational activity and a growing reliance on structured requisition processes across all categories.

The most significant contributor to overall RSN volume is the Leases category, which remains consistently high at 255 RSNs in FY22-23, 243 in FY23-24, 258 in FY24-25, and 266 in FY25-26. With a four-year mean of 255 RSNs, Leases account for nearly half of all annual requisitions, reflecting the scale and administrative intensity of NHC's territory-wide leasing portfolio.

Professional Services also show sustained high activity, increasing from 93 RSNs in FY22-23 to 90 in FY23-24, 120 in FY24-25, and 150 in FY25-26. The four-year mean of 111 RSNs indicates a growing demand for advisory, technical, and support services as NHC's operational and capital programs expand.

The Maintenance category demonstrates the most dramatic growth, rising from 67 RSNs in FY22-23 to 151 in FY25-26. This represents a 125% increase over the four-year period and reflects escalating maintenance needs across an ageing housing portfolio, as well as improved tracking and requisition practices.

Major Construction RSNs have also increased substantially, moving from 12 in FY22-23 to 21 in FY23-24, 36 in FY24-25, and 68 in FY25-26. This nearly six-fold increase aligns with the expansion of capital delivery programs and the shift toward multi-vendor procurement frameworks that generate more requisitions.

In the Goods category, RSNs rose sharply from 21 in FY22-23 to 92 in FY23-24 and 111 in FY24-25, before stabilizing at 93 in FY25-26. This pattern reflects both supply chain normalization and increased use of structured procurement tools for materials and equipment.

Finally, Air Charters remain a low-volume but essential category, with RSNs fluctuating between 2 and 7 per year. The four-year mean of 4 RSNs reflects the episodic nature of charter requirements tied to inspections, emergency responses, and remote community access.

Taken together, these trends illustrate a procurement environment characterized by growing operational demand, more granular requisitioning, and increased administrative throughput. The rise from 450 to 732 RSNs over four years underscores the scale and complexity of NHC's service delivery obligations and highlights the importance of continued investment in procurement capacity, planning, and systems modernization.

Annual RSN Count					
Category	**FY 22-23**	**FY 23-24**	**FY 24-25**	**FY 25-26**	**4-Year Mean**
Major Construction	12	21	36	68	28
Professional Services	93	90	120	150	111
Air Charter	2	5	7	4	4
Maintenance	67	41	88	151	78
Goods	21	92	111	93	67
Leases	255	243	258	266	255
Total RSNs	450	492	620	732	563
Year-over-Year Net Volume		42	128	112	

Table 5 - Annual RSN Count

MAJOR CONSTRUCTION CONTRACTS

Section A provides a summary of all Major Construction contracts awarded by the Nunavut Housing Corporation (NHC) during the 2025–26 fiscal year. Major Construction includes all construction-related contracts valued at $25,000 or more, as defined in the Government of Nunavut's Contracting Procedures Manual.

This section presents an overview of construction activity across the territory, including the total value of awarded contracts, the distribution of procurement methods, and the participation of Inuit, Nunavut, and Other vendors. The summary supports transparency in capital project delivery and provides insight into how NHC advances housing development and infrastructure priorities.

Figure 1 and Table 6 illustrate the breakdown of Major Construction contracts by:

- Procurement Method - including Public Tender (RFT), Request for Proposal (RFP), Standing Offer Agreement (SOA), Master Service Agreement (MSA), Sole Source (SS), and Negotiated Contract (NC).
- NNI Classification - identifying awards to Inuit, Nunavut, and Other vendors.

Contract values reflect the amount approved at the time of award. These values may differ from final expenditures due to change orders, amendments, or project adjustments. Information on contract status or progress can be provided upon request; however, proprietary or commercially sensitive information may be withheld in accordance with GN policy.

A complete listing of all Major Construction contracts, including vendor names, project descriptions, locations, procurement methods, and award values, is provided in Appendix A.

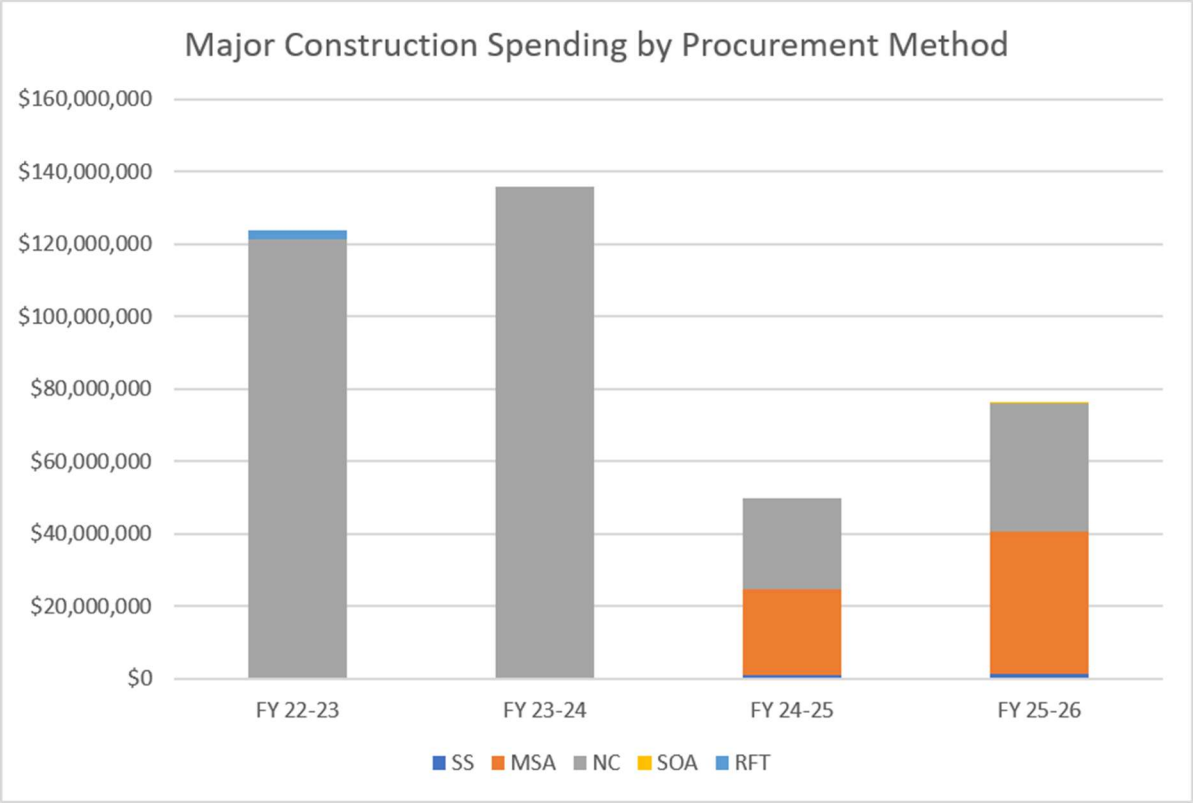

Figure 1 - Major Construction by Procurement Method

Major Construction							FY 25-26
Method of Selection		Amount	Percentage		Classification	Amount	Percentage
SS	Sole Source	$ 1,335,715	2%		**INUIT**	$ 20,555,885	27%
MSA	Master Service Agreement	$ 39,115,477	51%		**NUNAVUT**	$ 17,609,585	23%
NC	Negotiated Contract	$ 35,446,048	46%		**OTHER**	$ 38,088,613	50%
SOA	Standing Offer Agreement	$ 356,843	0%				
TOTAL		$ 76,254,082	100%		**TOTAL**	$ 76,254,082	100%

Table 6 - Major Construction Summary

O&M EXPENDITURES

Section B provides a summary of all Operations and Maintenance (O&M) contracts awarded by the Nunavut Housing Corporation (NHC) during the 2025–26 fiscal year. O&M contracts include all non-construction procurements valued at $5,000 or more, supporting the delivery, upkeep, and administration of NHC programs and housing assets across Nunavut.

This section presents an overview of procurement activity across five major O&M categories:

- Professional Services
- Air Charters
- Maintenance
- Goods
- Leases

Each category includes summary tables and figures showing the distribution of contracts by procurement method and NNI classification. These summaries provide insight into vendor participation, procurement trends, and the operational needs driving NHC expenditures.

PROFESSIONAL SERVICES

This category includes contracts for specialized expertise such as architectural and engineering services, financial and audit support, human resources, legal services, project management, environmental assessments, and other advisory functions. Figure 2 and Table 7 summarize Professional Services contracts by procurement method and NNI classification, highlighting the role of Standing Offer Agreements (SOAs) and Inuit and Nunavut firms in delivering professional support to NHC operations.

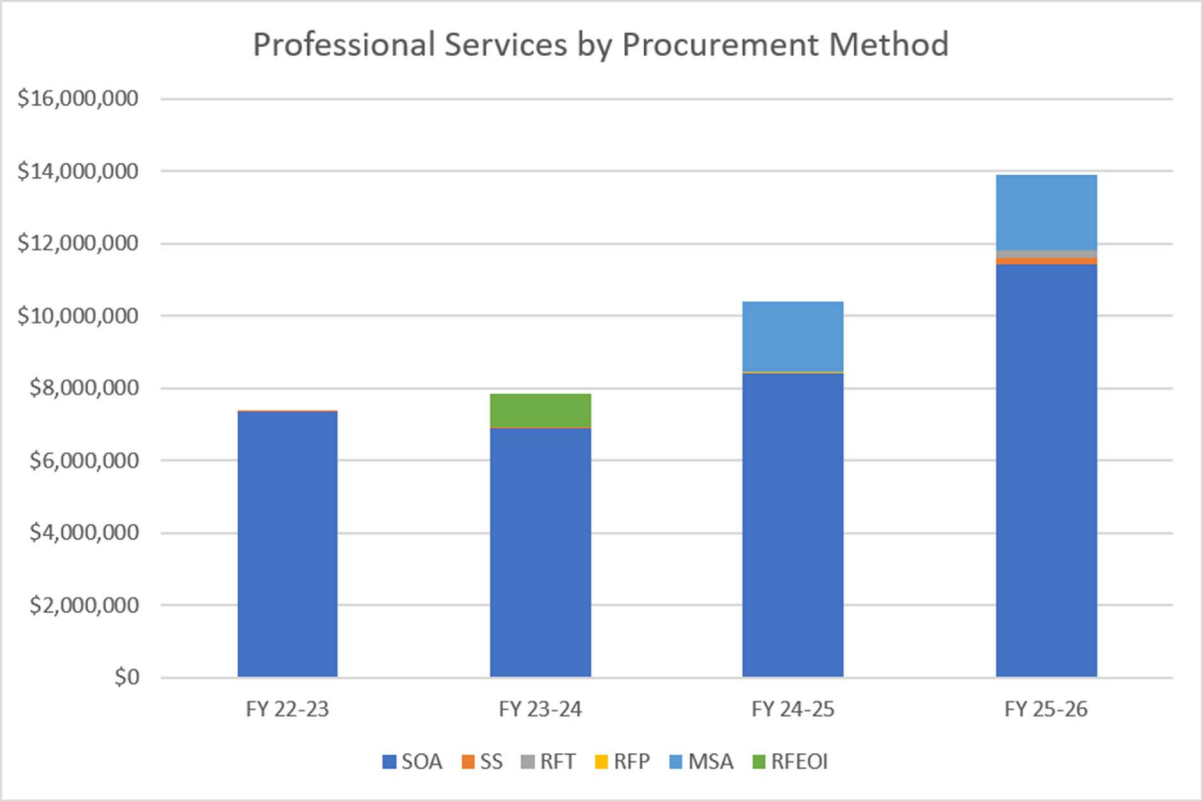

Figure 2 - Professional Services by Procurement Method

Professional Services								FY 25-26
Category: Professional Services		Amount	Percentage		Classification	Amount	Percentage	
RFT	Request For Tender	$ 187,500	1%		**INUIT**	$ 1,229,704	9%	
SOA	Standing Offer Agreement	$ 11,417,486	82%		**NUNAVUT**	$ 1,520,930	11%	
SS	Sole Source	$ 196,992	1%		**OTHER**	$ 11,144,970	80%	
MSA	Master Service Agreement	$ 2,093,627	15%					
TOTAL		$ 13,895,604	100%		**TOTAL**	$ 13,895,604	100%	

Table 7 - Professional Services Summary

AIR CHARTERS

Air charter services are procured to support travel to and within remote communities where scheduled air service is limited or unavailable. These contracts enable project delivery, inspections, community engagement, and operational support across the territory. Figure 3 and Table 8 summarize air charter expenditures by procurement method and vendor classification.

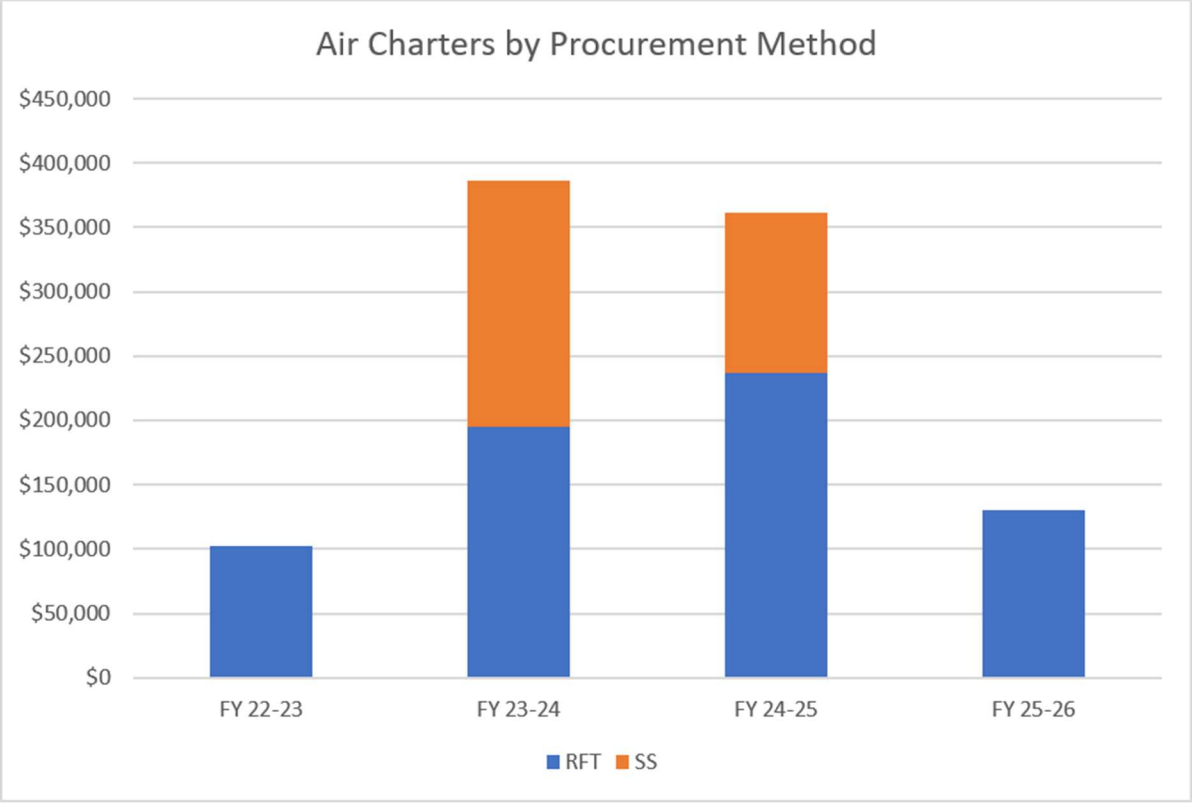

Figure 3 - Air Charters by Procurement Method

Air Charters								FY 25-26
Method of Selection		Amount	Percentage		Classification	Amount	Percentage	
RFT	Public Tender	$ 130,121	100%		INUIT	$ 130,121	100%	
					NUNAVUT	$ -	0%	
					OTHER	$ -	0%	
TOTAL		$ 130,121	100%		TOTAL	$ 130,121	100%	

Table 8 - Air Charters Summary

MAINTENANCE EXPENSES

Maintenance expenditures include preventative and demand maintenance for public housing, staff housing, and corporate facilities not serviced by Local Housing Organizations (LHOs). This category includes HVAC work, mould remediation, asbestos abatement, structural repairs, and other essential services. Figure 4 and Table 9 summarize maintenance contracts by procurement method and NNI classification, reflecting the high operational demand for responsive and specialized services.

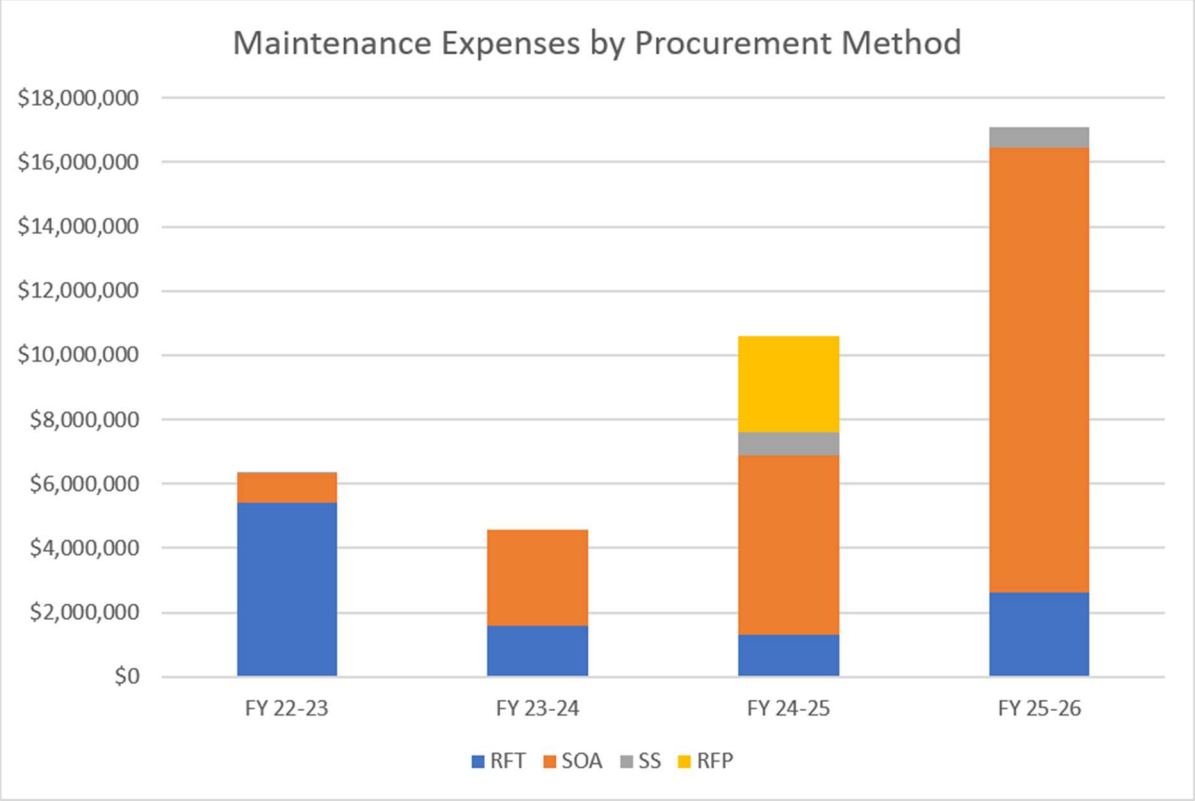

Figure 4 - Maintenance Expenses by Procurement Method

Maintenance Expenses							FY 25-26
Method of Selection		Amount	Percentage		Classification	Amount	Percentage
RFT	Request for Tender	$ 2,624,574	15%		**INUIT**	$ 7,526,114	44%
SOA	Standing Offer Agreement	$ 13,825,542	81%		**NUNAVUT**	$ 3,138,774	18%
SS	Sole Source	$ 621,636	4%		**OTHER**	$ 6,406,864	38%
TOTAL		$ 17,071,753	100%		**TOTAL**	$ 17,071,753	100%

Table 9 - Maintenance Expenses by Procurement Method

GOODS

Goods include purchases of materials, equipment, supplies, and other tangible items required to support NHC operations. This category excludes architectural, engineering, consulting, legal, air charter, maintenance, and leasing expenditures. Figure 5 and Table 10 summarize goods procurement by method of selection and vendor classification.

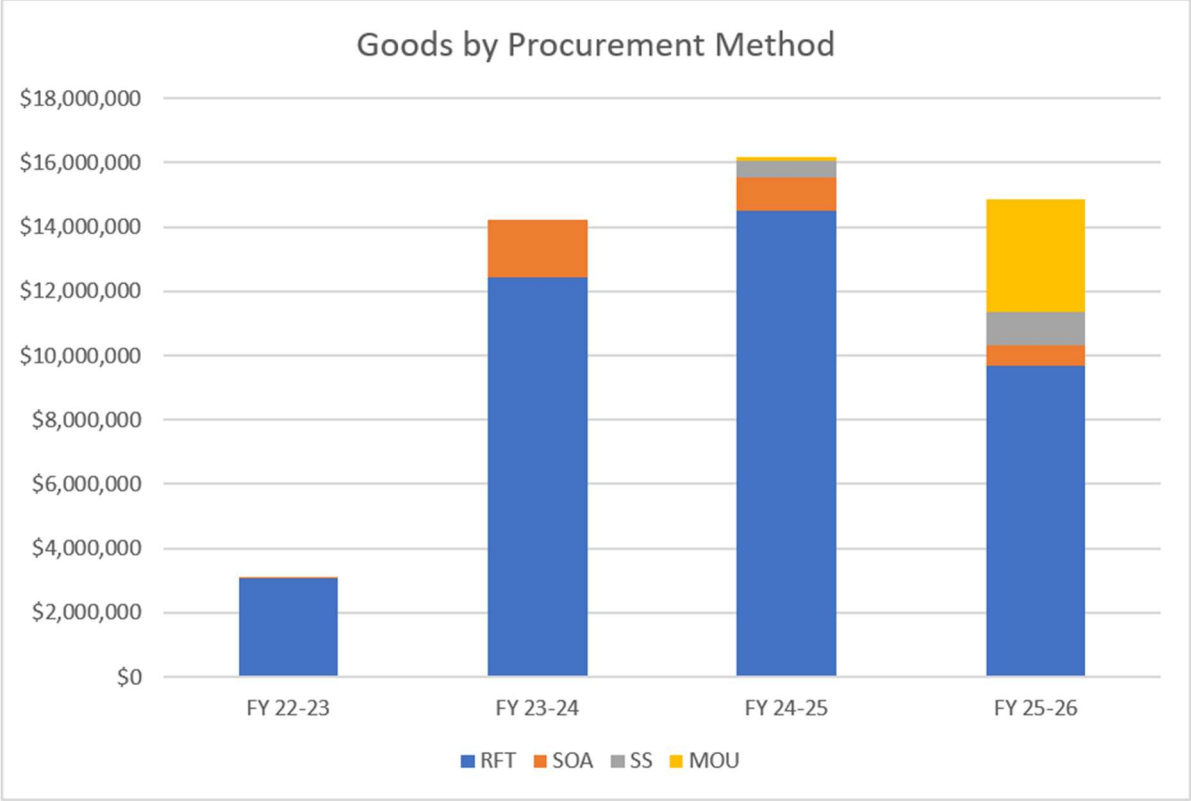

Figure 5 - Goods by Procurement Method

Goods							FY 25-26
	Method of Selection	Amount	Percentage		Classification	Amount	Percentage
RFT	Public Tender	$ 9,665,703	65%		INUIT	$ 10,223,367	69%

TOTAL		$ 14,852,983	100%		TOTAL	$ 14,852,983	100%

Table 10 - Goods Summary

LEASES

This section provides information on leases held by the NHC used for public and staff housing.

In 2025-2026, new leases were primarily procured through Request for Proposals (RFP). Where possible, NHC opted to renew most leases under the same vendors, as the units were already occupied by NHC public housing or staff housing tenants. Failing to renew the leases would cause significant disruption to operations.

Leases acquired through Memoranda of Understanding (MOUs) are in respect of units acquired on behalf of departments of the Government of Nunavut. All new and all renewed leases are for a period between one and five years.

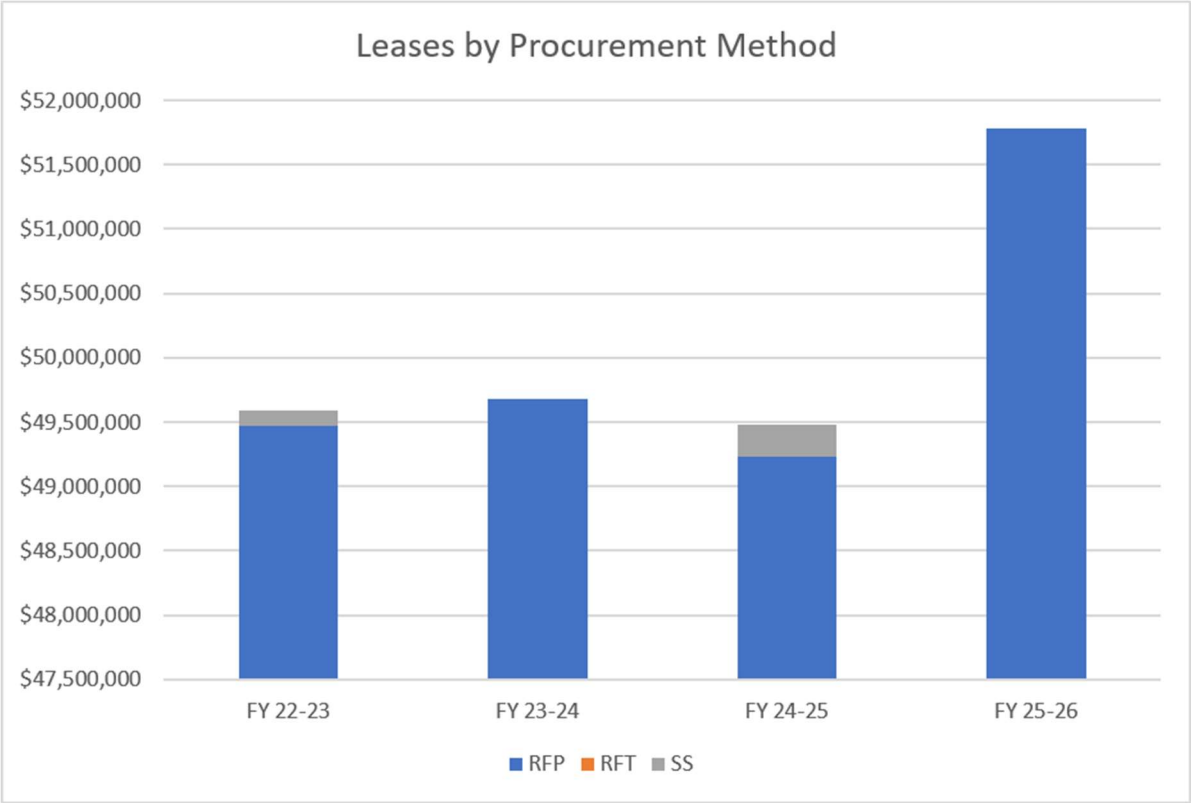

Figure 6 - Leasing by Procurement Method

Leases							FY 2025-26
Method of Selection		Amount	Percentage		Classification	Amount	Percentage
RFP	Request For Proposal	$ 51,785,094	100%		INUIT	$ 13,143,696	25%
					NUNAVUT	$ -	0%
					OTHER	$ 38,641,398	75%
TOTAL		$ 51,785,094	100%		TOTAL	$ 51,785,094	100%

Table 11 - Leasing Summary

SOLE SOURCING

Sole Source contracting practices are monitored closely. NHC believes it can get the best value for money through competitive bidding processes. However, there are limited instances where the GN's contracting procedures permit awarding contracts without competition. Listed below are the acceptable conditions for awarding contracts without competition:

1. The goods, services or construction are urgently required, and delay would be harmful to the public interest.
2. Only one party is available and capable of performing the contract.
3. The contract is an architectural or engineering contract that will not exceed $25,000 in value or is any other type of contract that will not exceed $5,000 in value.

Any individual category could potentially have sole-sourced contracts. The total amount of sole-sourced contracts for NHC in FY 25-26 amounted to approx. $3.16 million. A breakdown by category explaining the typical sole-sourcing reason for each category is provided below:

Major Construction: Sole-sourcing related to major construction typically relates to services provided by the GN such as building permit issuance and by QEC for power connections related to new construction.

Professional Services: Sole-sourcing under the professional services category is typically for professional services in which only one party is capable of providing the service such as software implementation support for a specific software suite or in the case of specialized services requiring urgent response such as pest control.

Maintenance Expenses: The majority of the maintenance expenses procured through sole-sourcing were done for emergencies and repairs with a notably As & When Snow Clearing Contract that was sole-sourced after twice attempting to procure that service through a public tender process without success.

Goods: Most sole source contracts in the goods category are for specialized software and computer services.

Leases: There are instances when NHC must enter into lease agreements via sole source due to the shortage of available rental units.

CONCLUSION

The 2025–26 Contracting, Procurement, and Leasing Activity Report demonstrates the Nunavut Housing Corporation's continued progress toward a more transparent, competitive, and strategically balanced procurement environment. The year's data reflects a maturing framework in which structured tools-particularly Master Service Agreements and Standing Offer Agreements-play an increasingly central role in supporting timely, compliant, and cost-effective service delivery across the territory.

The sustained decline in Negotiated Contracts, combined with the growth in competitive call-ups and diversified procurement methods, signals a meaningful shift toward practices that strengthen fairness, openness, and value for money. Rising RSN volumes across all major categories highlight both the scale of NHC's operational responsibilities and the importance of ongoing investment in procurement capacity, planning, and systems modernization.

Vendor participation patterns continue to support the Government of Nunavut's Article 24 commitments, with Inuit and Nunavut firms playing a significant role across construction, professional services, maintenance, and goods procurement. Sole-source contracting remains targeted and policy-aligned, used only where urgency, exclusivity, or operational necessity justify non-competitive award.

Overall, the 2025–26 fiscal year reflects a procurement environment that is more disciplined, more competitive, and better positioned to support NHC's mandate. The trends identified in this report will inform future planning, strengthen corporate oversight, and contribute to improved housing outcomes for Nunavummiut.

GLOSSARY

Goods: Contracts for the purchase of materials, supplies, equipment, and other tangible items acquired by the Nunavut Housing Corporation (NHC), typically through purchase orders. Goods do not include architectural, engineering, consulting, legal, air charter, maintenance, or leasing expenditures.

Invitational Tender: A competitive procurement process in which tender documents are issued directly to a selected group of suppliers invited to submit bids.

Public Tender (Request for Tender – RFT): A publicly advertised competitive procurement process open to all interested bidders, typically used for higher-value or complex procurements.

Sole Source (SS): A non-competitive contract awarded when urgency, supplier exclusivity, or GN-approved thresholds permit. Sole source is only allowed when:

- the requirement is urgent;
- only one supplier is capable;
- architectural/engineering contracts are $25,000 or less; or
- other goods/services are $5,000 or less.

Request for Proposal (RFP): A procurement method used when the GN knows the desired outcome but seeks proposals on how best to achieve it. Evaluation includes methodology, qualifications, Inuit employment, NNI benefits, and price.

Tender: A procurement process issued through public advertisement or private invitation, depending on the value and nature of the requirement.

Master Service Agreement (MSA): A procurement method establishing pre-qualified suppliers for recurring or multi-year requirements. Contracts issued under an MSA follow the terms and pricing set in the agreement.

Standing Offer Agreement (SOA): A non-binding arrangement with one or more suppliers to provide goods or services at pre-arranged rates. Individual call-ups issued under an SOA become binding contracts.

Negotiated Contract (NC): A contract awarded through direct negotiation with a supplier when permitted under GN policy, typically for specialized or unique requirements.

Memorandum of Understanding (MOU): A non-binding agreement between NHC and another party that outlines shared responsibilities, roles, and expectations for a specific initiative or activity. MOUs are used to formalize collaborative arrangements, clarify operational or administrative responsibilities, and document mutual commitments without creating a contractual obligation.

NNI Classification: Vendor classification based on the Nunavummi Nangminiqaqtunik Ikajuuti (NNI) Policy and Nunavut Tunngavik Incorporated (NTI):

- Inuit – NTI-registered or NTI/NNI-registered vendors
- Nunavut – NNI-registered vendors
- Other – Vendors not registered with NTI or NNI

Contract Award Value: The amount approved at the time the contract is issued. This may differ from the final amount paid due to amendments or change orders.

Change Order: A formal modification to an existing contract that alters scope, value, schedule, or deliverables.

Call-Up: A purchase or service request issued under a Standing Offer Agreement (SOA). Each call-up becomes a binding contract.

Procurement Thresholds: Dollar values that determine which procurement method must be used. NHC follows GN-established thresholds for construction, goods, and services.

Vendor Status Verification: The process of confirming a supplier's NNI or NTI registration at the time of contract award.

Inuit Firm: A business registered with Nunavut Tunngavik Incorporated (NTI) under Article 24 of the Nunavut Agreement.

Bid Adjustment: A competitive advantage applied to Inuit and Nunavut businesses under the NNI Policy to improve evaluated scores without changing the actual bid price.

Evaluation Criteria: The weighted factors used to assess proposals in an RFP process, such as methodology, experience, Inuit employment, NNI benefits, and price.

Contract Type: The category of work being procured, such as Major Construction, Professional Services, Maintenance, Goods, Air Charters, or Leases.

Fiscal Year (FY): The Government of Nunavut fiscal year, running from April 1 to March 31. All reporting corresponds to the fiscal year in which the contract was awarded.
